

FOR 5187: Forschungskolloquium 2024

Jeder 3. Freitag im Monat | 10:00-11:30 Uhr

Online via Zoom

Termin	Titel
19.01.2024	SP5: Transdiagnostic psychological factors as predictors of treatment non-response and cost-effectiveness measures related to predictive analytics in psychotherapy
16.02.2024	SP1: Single-case prediction of treatment (non-) response to cognitive-behavioral therapy (CBT) in the outpatient sector: a prospective-longitudinal observational study
Wintersemesterferien: 17.02.2024-15.04.2024	
19.04.2024	SP3: Neuroimaging backbone and large-scale data harmonization
17.05.2024	SP7: Die Entwicklung eines Biomarkers basierend auf dem anterioren cingulären Cortex zur Einzelfallprädiktion des Behandlungsergebnisses einer kognitiven Verhaltenstherapie in internalisierenden Störungen
21.06.2024	SP9: Generalizing predictive patterns of treatment (non-) response: from specific phobia and obsessive-compulsive disorder to the anxiety spectrum
19.07.2024	SP2: Methods toolbox and infrastructure for predictive analytics
Sommersemesterferien: 20.07.2024-14.10.2024	
18.10.2024	SP8: Dynamic causal modelling of emotion regulation as predictors of treatment (non-) response to CBT in internalizing disorders
15.11.2024	SP4: Brain-electrical and cardiovascular indicators of emotion regulation as predictors of treatment (non)-response to CBT in internalizing disorders
20.12.2024	SP6: Digital Phenotyping of emotion (dys-)regulation as transdiagnostic process and proxy for clinical and neurobiological markers of treatment (non-)response
