

FOR 5187: Forschungskolloquium 2025-2026

Jeder 3. Freitag im Monat | 10:00-11:30 Uhr

Termin	Titel	Referent:in
21.02.2025	SP8: Dynamic causal modelling of emotion regulation as predictors of treatment (non-) response to CBT in internalizing disorders	Sabrina Golde
Wintersemesterferien: 17.02.2025-13.04.2025		
16.05.2025	SP7: Die Entwicklung eines Biomarkers basierend auf dem anterioren cingulären Cortex zur Einzelfallprädiktion des Behandlungsergebnisses einer kognitiven Verhaltenstherapie in internalisierenden Störungen	Charlotte Meinke
20.06.2025	SP3: Neuroimaging backbone and large-scale data harmonization	Sarah Wellan
18.07.2025	SP9: Generalizing predictive patterns of treatment (non-) response: from specific phobia and obsessive-compulsive disorder to the anxiety spectrum	Marija Tochadse
Sommersemesterferien: 21.07.2025-12.10.2025		
17.10.2025	SP2: Methods toolbox and infrastructure for predictive analytics	Sam Gijsen
21.11.2025	SP4: Brain-electrical and cardiovascular indicators of emotion regulation as predictors of treatment (non)-response to CBT in internalizing disorders	Julia Klawohn
19.12.2025	SP6: Digital Phenotyping of emotion (dys-)regulation as transdiagnostic process and proxy for clinical and neurobiological markers of treatment (non-)response	Leona Hammelrath
16.01.2026	SP5: Transdiagnostic psychological factors as predictors of treatment non-response and cost-effectiveness measures related to predictive analytics in psychotherapy	Sarah Wyka
20.02.2026	SP1: Single-case prediction of treatment (non-) response to cognitive-behavioral therapy (CBT) in the outpatient sector: a prospective-longitudinal observational study	Till Langhammer
