

FOR 5187: Forschungskolloquium 2023Jeder 3. Freitag im Monat | 10:00-11:30 Uhr
Online via Zoom

Termin	Titel	Referent:in
20.01.2023	SP1: Single-case prediction of treatment (non-) response to cognitive-behavioral therapy (CBT) in the outpatient sector: a prospective-longitudinal observational study	Prof. Dr. Ulrike Lüken
17.02.2023	SP7: Anterior cingulate cortex-based biomarker development for cognitive-behavioral therapy (CBT) response prediction in internalizing disorders	Dr. Kevin Hilbert, Charlotte Meinke M.Sc.
Wintersemesterferien: 19.02.2023-16.04.2023		
21.04.2023	SP4: Brain-electrical and cardiovascular indicators of emotion regulation as predictors of treatment (non)-response to CBT in internalizing disorders	Prof. Dr. Julia Klawohn
05.05.2023	SP3: Neuroimaging backbone and large-scale data harmonization	Prof. Dr. Henrik Walter, Sarah Wellan, M.Sc.
16.06.2023	SP9: Generalizing predictive patterns of treatment (non-) response: from specific phobia and obsessive-compulsive disorder to the anxiety spectrum	Marija Tochadse, M.Sc.
21.07.2023	SP2: Methods toolbox and infrastructure for predictive analytics	tba
Sommersemesterferien: 23.07.2023-15.10.2023		
20.10.2023	SP6: Digital Phenotyping of emotion (dys-)regulation as transdiagnostic process and proxy for clinical and neurobiological markers of treatment (non-)response	tba
17.11.2023	SP8: Dynamic causal modelling of emotion regulation as predictors of treatment (non-) response to CBT in internalizing disorders	tba
15.12.2023	SP5: Transdiagnostic psychological factors as predictors of treatment non-response and cost-effectiveness measures related to predictive analytics in psychotherapy	tba
